

## Lateral Lamp Holder KS-4000

KSE-LIGHTS holder KS-4000

Examples for the use of KSE-LIGHTS Holder KS-4000

The new lateral lamp holder was developed in accordance with the standards of the new norm EN-443:2008 for Firefighters' helmets. The lampholder is made from glass fibre reinforced nylon. Thus the holder is very lightweight, very sturdy and not inflammable. With a spherical joint and the variable lamp holder, the lamp can be adjusted in all directions. By means of the new adapter the lamp engages and can no longer get lost unintentionally. The lateral holder can be used with all KSE-LIGHTS helmet lamps.

**An application for the approval of the lateral holder for the use with Firefighters' helmets made by Schubert is awaited.**

## Clip holder KS-5630

With the clip holder all KSE-LIGHTS lamps can be fixed on jackets or belts.
